

Cedric Roulof

Software Engineer | Fullstack & Systems Development

France (open to fully remote) | +82 10-4268-6531 | cedric.roulof1@gmail.com

Portfolio: shookapic.github.io | GitHub: github.com/shookapic

PROFESSIONAL SUMMARY

Fullstack and systems developer with over a year of professional experience delivering production web applications, REST APIs, and developer tooling. Skilled in Python, C/C++, React, Node.js, and PHP Laravel, with hands-on work in LLVM/Clang static analysis, local LLM deployment, AWS cloud infrastructure, and offensive security. Proven record across e-commerce, public sector, and enterprise environments. Native French speaker, professional English, available for fully remote roles.

TECHNICAL SKILLS

Languages: C, C++, Python, JavaScript, PHP, SQL, HLSL

Frontend: React, Vue.js, HTML, CSS, Figma

Backend & Data: Node.js, PHP Laravel, REST API design, MySQL, Oracle, database migration

Systems & Tooling: LLVM, Clang, static analysis, SARIF, Unreal Engine 5, Linux, Windows

AI / ML: LLM fine-tuning, llama.cpp, local LLM deployment

DevOps & Cloud: Docker, AWS, DigitalOcean, CI/CD, GitHub Actions, Git, SSH

Security: Penetration testing, Burp Suite, Hydra, CTF, vulnerability remediation

PROFESSIONAL EXPERIENCE

Fullstack Developer (Python, React)

Groupe Caille | Reunion Island, France | Apr 2025 - Aug 2025

- Rewrote a business-critical internal application from WinDev to a Python and React stack, improving application performance and modernizing the user interface.
- Migrated the production database from Oracle to MySQL, preserving data integrity while reducing licensing overhead.
- Interviewed stakeholders across multiple departments to map business requirements and drive UI/UX decisions.

Fullstack Developer (Node.js, React)

Regal Vanille | Reunion Island, France | Sep 2024 - Feb 2025

- Built a production e-commerce platform end to end using Node.js (backend), React (frontend), and MySQL (data layer).
- Re-architected hosting on AWS cloud infrastructure, increasing site availability and uptime.

Fullstack Developer (PHP Laravel, Vue.js, C++)

Departement de La Reunion (DSID) | Reunion Island, France | Aug 2023 - Dec 2023

- Deployed a self-hosted Large Language Model to meet internal user needs, including dataset preparation and fine-tuning.
- Designed and implemented REST APIs to expose model capabilities to internal applications.

PROJECTS

CoreTrace | Open-Source C/C++ Static Analysis Tool | 2025 - Present

- Co-building a free, open-source static analysis tool for C/C++ on LLVM/Clang 20 with SARIF output for CI integration; own the GUI in a four-person team.
- Attracted early interest from enterprise contacts in certification-driven industries (embedded, aerospace, defense).

Innov4Safe Hackathon | Grand Prize Winner | Oct 2024

- Won first place at the Reunion Island prefecture hackathon by building an intelligent system that automatically reports local field data during cyclone events.

Chisel | Capture The Flag Program, Epitech | Jun 2025 - Jul 2025

- Placed in the top 10 fastest finishers across a three-week offensive-security program: identifying vulnerabilities, exploiting them, and proposing remediations.

EDUCATION

Epitech | Master of Science in Computer Science (RNCP Level 7), Software Engineering Expert

Sep 2022 - 2027 (5th year)

Keimyung University, Seongso Campus, South Korea | Exchange Semester, Video Game Development

Aug 2025 - 2026 | GPA: 3.9 / 4.0
